Summary

MERN Stack Developer with 9+ months of production experience building marketplace features using **React.js**, **Node.js**, and **Sharetribe Flex APIs**. Delivered role-based authentication systems, AI-powered chatbot integrations, and responsive UIs across client-facing applications. Experienced in REST API development, MongoDB schema design, and Git-based team workflows. Seeking a full-stack or frontend developer role in Delhi NCR.

Skills

Languages: JavaScript (ES6+), C++, TypeScript (foundational)

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Context API

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database & Tools: MongoDB, Mongoose, Postman, Git/GitHub, Render, Vercel

Experience

Associate Software Developer

June 2025 – Feb 2026

Devscrew (Remote)

- Built and maintained production-grade **React.js** web applications, refactoring **10+ components** and improving UI consistency across marketplace client dashboards.
- Integrated **Sharetribe Flex APIs** to handle end-to-end marketplace features including listings, user accounts, and transactions, enabling seamless buyer-seller interactions.
- Caught **15+ API-frontend mismatches** during code review, preventing post-deployment bugs and reducing integration issues across sprints.
- Collaborated in a **5-person Agile team** using Git feature branching and weekly PR review workflows, maintaining clean commit history across shared repositories.
- Tested and documented REST APIs using **Postman**; supported deployment of backend on **Render** and frontend on **Vercel**.

Projects

Rental Cars Platform | *MongoDB, Express.js, React.js, Node.js, Tailwind CSS, JWT*

[Live link](#)

- Developed a full-stack car rental platform with **JWT-based role-based access control**, implementing protected routes and middleware-level authorization in **Express.js** for Admin and User roles.
- Designed **MongoDB schemas** using Mongoose with relationships between Users, Cars, and Bookings collections, supporting end-to-end rental workflow queries.
- Built **RESTful APIs** for car listings, bookings, and user operations with async/await and centralized error handling across all Express routes.
- Integrated **Gemini AI-based chatbot** to handle user queries, improving self-service support and overall user engagement.
- Designed a fully **responsive UI** using React.js and Tailwind CSS, ensuring seamless experience across mobile and desktop.

Employee Management System | *React.js, Context API, Tailwind CSS*

[Live link](#)

- Built a **role-based dashboard** with separate Admin and Employee views using React.js and **Context API** for global state management.
- Implemented task assignment and tracking system with real-time status updates and localStorage-based session persistence.
- Designed responsive UI with **Tailwind CSS**; planning MongoDB + Express backend migration to convert to full MERN stack.

Education

B.Tech. Computer Science Engineering

Guru Gobind Singh Indraprastha University, Delhi

Graduated: 2024

CGPA: 8.72 / 10
